

Understanding the Language: Indian Way

Duration: 10 hours (5 sessions × 2 hours)

Mode: Interactive lectures, Assignments, and Mini-project

🌱 Why this course?

Language is not merely a collection of words; it serves as the bridge between bhaava (intention) and expression. This course offers a clear foundation to “Intention” and its manifestation “language”. It explains in depth about functions and flows of language and relation between language and grammar.

🌀 What you will learn

Bhaava in detail – dimensions and definitions of intention.

Intention & expression – how intentions are carried or shifted through language.

Core components of Intention & Parts of speech – including verbs, nouns, particles, adjectives, and their intentional force.

Limitations of language – how some intentions cannot be expressed by any language, the role of ‘socio cultural elements are limiting and expanding’ in the limitations of languages.

Relation of Language and Grammar – how rules emerge naturally from patterns of expression.

🌀 Learning outcomes

By the end of this course, learners will be able to:

Recognize how intentions surface in everyday sentences.

Identify linguistic features that signal intention.

Understand the role of context and multimodality in interpreting meaning.

Appreciate the expressive richness of Sanskrit and its theories.

Bhāvajālam
